Cognitive Genesis Study

The Longer children attend Adventist schools, the higher their average achievement.

“*Cognitive Geness* is a 4-year study of 30,000 students, grades 3-9 and 11, enrolled in Adventist Schools across North America. This rigorous research (www.cognitivegenesis.org), conducted at La Sierra University, is validating what parents, teachers, and students involved

in Adventist education have known for years—that, overall, Adventist school students perform better than the national average.”

Cognitive Genesis Results

Not only do students score a half-grade-level higher in all subjects, but the more years they attend an Adventist school, the more their average achievement jumps-up to the 73rd percentile.
